UVELIOS[®] 500

Germ-free without chemicals

Air disinfection system for closed rooms **UVELIOS® 100**

The UVELIOS® 100 wall mounted unit is used for effective air disinfection in rooms that are not connected to a central air conditioning system. Due to its closed construction, the UVELIOS® 100 can be used in rooms where people are constantly present. The device is equipped with two highpower UVC lamps and is suitable for disinfecting rooms with an air volume of up to 100 m³. The integrated fans, for active air circulation, have been specially developed to promote a high air volume with minimum noise emission.

Execution

- Compact design and easy installation
- High-quality lamps, life 10,000 h
- Integrated operating hours counter signals timely lamp replacement
- Simple maintenance by changing the tubes, no other wearing parts are present in the UVELIOS® 100
- Simple plug and play system for conventional house network, at the push of a button, with immediate effect, ready for use
- Available colors: Traffic white or traffic grey

Air disinfection system for production and storage rooms UVELIOS[®] 500

The powerful UVC lamp makes it possible to operate the UVELIOS® 500 with only one lamp. Other manufacturers require up to 4 lamps for a lower dose. The system is completely equipped with a light trap. This light trap makes it possible to install the system in low rooms without exposing the employees to UVC light. The integrated fan and all electronic components are protected against UVC to the components ageing over time. Disinfection performance up to 99.9%.

Execution

- Easy installation
- High-quality lamps, life 10,000 h
- Integrated LampCONTROL LT / controller displays the operating hours and system status
- Alarm signals necessary lamp replacement, automatic lamp switch-off
- Fast service
- Suitable for cooled room temperatures up to 5°C / 41°F

UVELIOS® 100

Product features

- Robust industrial housing
- · Ready to use delivery
- Easy installation
- Low noise emission
- Long lamp life time
- Efficient reduction of the airborne germ level

Areas of prevention

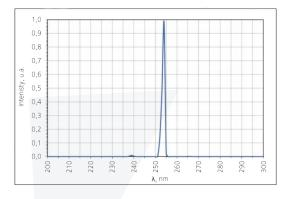

- Office and production rooms
- Schools
- Preschools
- Public institutions
- Packaging material storage
- Waiting rooms
- Laboratories
- Patient rooms in hospitals

Technical data

Туре	UVELIOS [®] 100	
Dimensions (LxWxH)	867x396x155 mm	
Weight	Approx. 15 kg	
Room size	Up to 100 m ³	
Supply voltage	230 V / 50-60 Hz	
UVC lamp	Two UVC lamps	
	PUV-LP 650/01	
Nominal power	80W
